

As with most rescues there are always animals who are unable to be rehomed due to ongoing health and/or temperament issues. Tameside Rabbit and Guinea Pig Rescue are introducing a new sponsorship scheme, especially for those animals who will stay in our care for the rest of their lives. Sponsorship will enable the Centre to continue to pay for ongoing veterinary treatment and to provide a permanent place of safety.

If you would like to sponsor one of the animals listed below please contact the Centre on 0773 883 1872 or by email at: office@tamesiderabbitandguineapigrescue.info for advice on where to send your completed form.

As a sponsor you will receive a quarterly newsletter, a key ring with your adopted pet's photograph and a Christmas and Birthday card from your own rabbit, guinea pig or chinchilla.

The following rabbits are available for *virtual* adoption via your sponsorship.

Ronaldo has come to the rescue after having various breeder homes, and unfortunately his last home was no longer able to keep him. He is 8 months old and is getting used to be handled and likes coming out on fundraising events and school visits.

Will and Brad are 2 young male French lops who were born on 23/12/09 and they live together. As you can see Brad has a bad eye (his eyelid was ingrowing), which was untreated until the brothers came to us. He has now had a small operation to stitch back the eyelid so that his ingrowing lashes have been turned out allowing his eye to heal. The brothers are going to remain at the centre as Brad will need more surgery.

Sam is a 7 month old continental giant male who has come to the rescue. He has a extremely bad ear infection that is going to take months to clear but will probably return, he is very friendly and will stay at the centre

Sky is a young French lop female who has come to the rescue she is now 11 months and is a extremely badly tempered rabbit. She is one of the worst that we have had in for quite a time, as she is very prone to bite she will now remain with us.

Heidi is a 5 year old female Guinea Pig, who has come to the rescue after the owners children no longer bothered with her. Since arriving she has been to the vet as she has quite a large tumour underneath. As this is causing her no pain and the risk of operating is too high, she will remain here at the Centre.

Sandy is a 12 month old French lop who has come to the rescue. When she was recently spayed it has been found she has dental problems so will have to stay to enable her to have regular essential dental treatment.
